IMAGERY INFORMATION REPORT

MAJOR CONSTRUCTION ACTIVITY AT
OSTROV/GOROKHOVKA AIRFIELD, USSR (S)

(S/WNINTEL) When seen [] the runway was being extended and nine revetted hardstands were being modified at Ostrov/Gorokhovka Airfield, USSR.

25X1

(S/WNINTEL) A 299-meter-long runway extension and a 278-meter-long overrun were in the early stages of construction off the north-northeast end of the 2,913- by 70-meter runway. Modification to nine BADGER revetted hardstands in the northeast portion of the BADGER dispersal area was seen. The modification to each hardstand consisted of filling the sod center area with concrete blocks.

(S/WNINTEL) In addition, the northeast part of the BADGER dispersal taxiway was being widened. This widened portion extends from the BADGER maintenance apron to the north-northeast end-connecting link. Initial construction activity [] The taxiway was 17 meters wide; the widened taxiway will be 28 meters. Grading activity for two new parking/maintenance aprons and a possible new parking/maintenance apron and the removal of concrete blocks from the center of the POL truck parking apron were also observed.

25X1

(S/WNINTEL) The extension to the runway, the modification to the hardstands, and the construction activity in the northeast part of the BADGER dispersal area may be in preparation for the future deployment of other types of aircraft to this airfield. The specific types of aircraft that will be deployed here, however, cannot yet be determined. The south-west part of the BADGER dispersal area was unchanged, and the BADGER G regiment seen at both the airfield and the dispersal area was still present.

(TSR) Thirty-eight FITTER, one palletized FITTER, and four MOUJIK aircraft were observed at this airfield. This was the highest number of FITTER aircraft ever seen here and represents an increase of nine since 29 FITTER were observed on imagery of 3 March.

(S) Ostrov/Gorokhovka Airfield is a Soviet Naval Aviation airfield subordinate to the Baltic Sea Fleet Air Force. The airfield is 4 nautical miles southeast of Ostrov.
